

Important Reminder!

We would like to kindly remind all the Evergreen community residents that the golf course and related facilities are private property and solely for the use of members and their guests for golf related activities. Therefore it is forbidden for fishermen, bikers, walkers, dogs with or without owners, runners, roller bladers, non-member residents w/golf carts, etc. to enter the golf course property at all times.

Not only is this a liability issue, but could potentially create a very dangerous situation when golfers are playing the golf course. In essence we are trying to protect the residents from being struck by a golf ball or injured by any other activity which relates to golf course operations. CWC has received a number of complaints and we thought it important to remind everyone of the potential issues which could occur.

We thank you for your understanding.
